

PATENTED WEIGHING TRANSDUCER

STREAMLINE

Accuracy engineered into the rail itself.

Streamline's internationally patented Twin Strip Technology measures the true vertical force of every wheel while disregarding horizontal and torsional deflections — so rail imperfections never compromise your measurement.

KEY BENEFITS

- Legal-for-trade accuracy up to 100 km/h
- Detects imbalances & overloads, preventing fines
- Installs into existing track, minimal disruption
- No moving parts, durable, low maintenance
- Rail imperfections don't affect accuracy

KEY FEATURES

- Patented Twin Strip Technology
- Up to 8 transducer pairs per processor
- Integrates with any AVI system
- Legal for Trade, OIML R60 & R106
- Meets international environmental standards

APPLICATIONS

Mainline Shunting yards Mixed rolling stock Overload detection

Accuracy engineered into the rail itself. Book a consultation today.
