

IN-MOTION TRAIN WEIGHING SYSTEM

WEIGHLINE

All the accuracy of traditional weighing. None of the downtime.

Weighline delivers faster results and lower operational costs than traditional train weighing. Purpose-built Force Measurement Transducers, matched to your site, deliver reliable, certified weighing that keeps your traffic moving.

KEY BENEFITS

- Weigh in motion without slowing or uncoupling
- Lower cost of ownership than many alternatives
- Fast install, no expensive civil or rail costs
- Improves safety via imbalance & overload detection
- Reliable, durable, no moving parts

KEY FEATURES

- Integrates with any AVI / RFID system
- Recognises mixed rolling stock automatically
- Differentiates wagons from locomotives
- Gross / tare / net weighing
- Meets OIML R60 & R106

APPLICATIONS

Freight Aggregates Coal Steel Cement Ports Recycling
